

Re-use

## El Faròl

Rimini, Italy

### Sustainable art and design: Creative recycling for your home

In recent year there has been a growing interest on the final destination of our waste and on the end of life of our furniture.

El Faròl is a company that uses the best available techniques and solution to provide old furniture and recycled materials with a new life. El Faròl comes up with alternative uses for our old objects with fantasy and intelligence.

Thanks to an innovative concept, El Faròl successfully diverts useful materials, furniture and objects from landfill. With this material is creates ecological recycled furniture with a personal design line ranging from single pieces to limited series.

One of the organisation's best result is the reuse of pallets to create wooden kitchen furniture, tables, chairs and libraries. El Faròl provides modern furniture that is both eco-friendly and has a low impact on the environment. Moreover, the re-used materials benefit from the added value of the Made in Italy label.
